

PlantBox

Assembly Instructions

1. Orientate the back and side panels so that the corresponding pre-drilled holes overlap.

2. Bolt side panels to the back panel using the fixings provided through pre-drilled holes.

3. Slot planter trough end tabs in to the corresponding slots in the side panels.

4. Once all tabs are in, slide the trough down in to place.

5. Install planter dividers into corresponding slots in both the back panel and the planter troughs. Press firmly down to lock the trough into place

6. Always start from the bottom trough and work up. Repeat steps 3–5.

7. Your PlantBox is now fully assembled and ready for fixing and planting.

8. If adding irrigation, slot the side irrigation pipe into the corresponding pre-made holes.

9. Connect the horizontal irrigation pipes and pull the ends through the holes in the opposite side of the panel.
